1.JAVA

2.write a program to print odd numbers from 1 to 50 in descending order?

Start =1

 end = 50

for num in range(start, end + 1):

        if num % 2 != 0:

                print(num, end = " ")

3.what are the difference between data mining and data profiling?

Data mining: Data mining is an interdisciplinary topic that relies on statistics, web scraping, data extraction, machine learning as well as database systems.

Data profiling:finding data or metadata from the dataset present at our hands, it can be further broken down into three different types of metadata

4.what is the difference between list and tuples in python?

list in mutable (its elements can be changed), but tuple is immutable (its elements cannot be changed).

5.JAVA
